

# DeBabelizer Pro

*Equilibrium, \$595*

## Image Batch Processor

System Requirements: 486 or faster; Windows 95 or NT, 16MB RAM (32MB recommended); 20MB hard disk space; 8-bit or higher resolution monitor.

Summary: DeBabelizer is now available for both Windows 95 and NT. With a radically revamped interface, extended file support, and much more intuitive scripting capabilities, this application will be a godsend to Windows developers. It has one failing, though: it doesn't support QuickTime. **RS#214**
